FUNDAMENTALS OF RESILIENCE MASSIVE OPEN ONLINE COURSES

The University of the Philippines (UP) Resilience Institute is set to launch its Fundamentals of Resilience Massive Open Online Courses (MOOC Series). This series includes MOOC 1: Basics of Resilience and MOOC 2: Hazard and Risk Assessment Fundamentals, which will be available from January 26 to February 20, 2026.

The Fundamentals of Resilience MOOC Series aims to make disaster education widely accessible and provide foundational knowledge on resilience. These courses are designed to address a critical gap in accessible, high-quality education on disaster resilience, especially in disaster-prone regions like the Philippines. Given that communities are frontline actors in responding to and mitigating the effects of climate change and disasters, it is essential to democratize disaster education to build capacity at the community level, particularly among those who lack access to formal education on these topics.

The courses are free, online, and accessible, catering to learners from diverse backgrounds, including Disaster Risk Reduction and Management and Climate Change Adaptation practitioners, planners, educators, social workers, and members of the public seeking to strengthen their understanding of resilience, hazards, and disaster risk assessment.

Visit the UP Resilience Institute's website for more details and updates about the Fundamentals of Resilience MOOC Series: <https://resilience.up.edu.ph/>.
